INSTITUTIONAL STATISTICS

The Institutional Statistics Report provides a framework for the analysis of every other report at SSC. In order to understand the data collected, one must be familiar with the characteristics of the student body. This report is compiled each semester and provides demographics and statistical descriptors of learners at SSC. The report is compiled by Academic Affairs after receiving the data from the Information Technology Department. The student data supplied by IT covers topics such as age, ethnicity, income level, home city, and ACT scores.

2020-21 Institutional Statistics Results

The data collected for this report arose from three different semesters – summer 2020, fall 2020, and spring 2021. The data has not been aggregated since many of the students are duplicated and would give misleading information. For example, Table 13 shows student classification by gender. Therefore, adding all of the freshman for the three semesters would result in a miscount since some of the freshmen become sophomores during the year.

Statistics from the reports reveal that the majority of the students from each semester are under 24 years old with the largest majority under 20 years old. The median age of SSC students was between 19 and 25 years old in all three of the semesters reported. For all three semesters, more students were full-time but the percentages were closer. The majority of the students are white or Native American with about 56% of the students white and about 16% Native American.

Table 14 lists the ACT scores for the 2020 fall semester. All three semesters follow a similar pattern to the fall semester. The majority of students who have taken the ACT and attend SSC have scores that fall between 15 and 24. Over 500 of the students did not have an ACT score.

Representative data for students by home community is given in Table 15 with only the fall semester shown. This data reflects the main ten communities with these changing positions by one or two places each semester.

The first three home communities remain constant each time. These ten communities comprise over 45% of the SSC student body each semester.

2020-21 Institutional Statistics Analysis

The analysis of the data from the 2020-21 Institutional Statistics reveals that the majority of the fall students are freshmen, which could be interpreted to mean that SSC has students who are transferring or quitting before beginning their sophomore year. Through the leadership of the Vice President of Academic Affairs, the SSC faculty, Student Services, and staff will continue with the initiative toward degree completion. With the largest majority of students under twenty and from our five county area, the assessment team will be watching and evaluating the number of sophomores listed in the institutional statistics.
